Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 2, 6, 19, 20, 69 and 70 are rejected under 35 U.S.C. 102(b) as being anticipated by DiGirolamo (US Patent Number 4,357,861).

DiGirolamo discloses a beverage mixer and dispenser, comprising: a housing defining a mixing chamber (8) having an upper feed opening (7), the housing including an extract container (4) positioned above the upper opening of the mixing chamber and containing a powdery soluble drink extract; a metering device (6) positioned between the extract container and mixing chamber to dispense a desired amount of the drink extract from the extract container into the mixing chamber through the upper opening, for mixing with liquid in the mixing chamber to produce a beverage; and the feed opening is exposed at an exterior surface of the housing such that the feed opening is accessible from the outside the beverage mixer and dispenser, the feed opening leading into the mixing chamber, which is capable of meeting the intended use to allow manual addition of drink additives to the mixing chamber.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Application/Control Number: 10/666,325

Art Unit: 3754

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 2, 6-8, 19, 20 and 69-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Militello (DE 200 06 115) in view of Ogawa et al.

Militello discloses an extract container (2) with a metering device (11) leading to a mixing chamber as well as a hot water supply (3) leading to the same mixing chamber. Two rotors both function as mixing and aerating rotors in separate chambers. Militello lacks the separate feed opening for allowing manual additions of drink additives. Ogawa et al. disclose a separate feed opening (33) used in a similar hot beverage mixing device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the separate feed opening of Ogawa et al. with the device of Militello in order to add additives to the hot drink mix as taught by Ogawa et al. The modified Militello fails to disclose the lid, the shape of the blades, the rotor actuated from the bottom, the funnel-shaped mixing chamber and the intended use of cream. The examiner took official notice that the lid, the shape of the

blades, the rotor actuated from the bottom, the funnel-shaped mixing chamber and the intended use of cream are old and well known in the art. Since applicant did not traverse the official notice, these limitations are considered to be admitted prior art.

Allowable Subject Matter

5. Claims 23-26, 34-39, 41 and 43-51 are allowed.

Response to Arguments

Applicant's arguments filed April 20, 2007 have been fully considered but they 6. are not persuasive.

Applicant argues that DiGirolamo does not have a housing. The examiner disagrees. Applicant's claims define the housing as the mixing chamber and extract container (see claim 1). Since DiGirolamo has a mixing chamber and an extract container, it has the same housing as defined in applicant's claims. The feed opening is as accessible as applicant's is. It appears that applicant is trying to argue limitations from claim 7 into claim 1. Specifically, when applicant's lid is shut, the feed opening is not accessible and when the lid is open, it is accessible. It should be noted that claim 7 is not rejected as being anticipated by DiGirolamo. As depicted, DiGirolamo meets the claim limitations better than applicant's disclosure because DiGirolamo depicts access to the feed opening. Even if one were to read additional structure surrounding what is shown in Fig. 2, the feed opening would be as accessible as applicant's.

Applicant argues that Ogawa teaches away from using a mixing chamber. However, it should be noted that the rejection is not combining the mixing chamber of

Page 5 Art Unit: 3754

Ogawa to the device of Militello. The rejection clearly states that the separate feed opening for the extract is being added.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
